Overview of Tax Rates and Groups

Tax rates and tax groups are required to properly charge customers taxes. They are set up within the POS, and cannot be adjusted at corporate.

A tax group is what holds specific tax rates. Multiple groups can be created, giving a wide variety of taxing options for items. Up to 4 tax rates can be assigned, and any combination of these rates can be applied to tax groups.

Adjusting Tax Rates

1. Open the POS by double clicking the POS icon

3. Choose "actions"

2. Log into the POS

4. Choose "management"

5. Choose "TAXES"

6. Choose "tax rates"

tax rates

7. This screen allows you to adjust tax rate(s) and the name of the rate(s)

managem	nent TAX R	ATE DETAILS			
tax rate 1:	5.00 %	tax rate 1 name:	STATE TAX		
tax rate 2:	5.00 %	tax rate 2 name:	CITY TAX		
tax rate 3:	2.50 %	tax rate 3 name:	COUNTY		
tax rate 4:	0 %	tax rate 4 name:			
				cancel	save

8. When done, choose "save"

save

Tax rates are set at each store. If in a corporate environment, it is **very** important to make sure that every store and corporate have the tax groups set up in the same order. Failure to do this could cause taxing or reporting issues.

Adjusting Tax Groups

1. Open the POS by double clicking the POS icon

How Taxes Are Applied To Items

Individual items are taxed based on the "department" that they are in. Departments are tied to a specific "POS Flag". The "POS Flag" is what is contains the tax group. So, tax rates are associated to items in the following order:

Tax Rate(s) \rightarrow Tax Group \rightarrow POS Flag \rightarrow Department \rightarrow Item

For assistance with configurations, please contact Technical Support at Support@FasTraxPOS.com
